EXPERIENCE

Event Farm *Software Engineer* Feb 2016 - Present
Headed the custom integrations between Event Farm and Salesforce, a market leading integration between the two platforms. The PHP Salesforce Rest API Solution we built for our integrations has been open sourced and is available on Github.

Led the charge to update Bootstrap 2 to Bootstrap 3/4 while updating pages that were previously non-responsive to mobile first.

Assisted in the rearchitecture of the API codebase, decoupling ourselves from CakePHP 2.x to a custom app built using CQS principles, that maintains over 85% Code Coverage.

Web Services LLC *Full Stack Web Developer* June 2014 - Oct 2015
Led development of AdStat.io, utilizing Laravel, MySQL, MongoDB, JavaScript, jQuery, HTML and CSS; Git.

Updated and optimized existing projects in PHP MVC frameworks including Laravel, Code Igniter, and CakePHP.

Maintained LAMP stack on a CentOS dedicated private server receiving anywhere from 10,000 to 1,000,000 daily requests.

Digital Canvas Design LLC *Owner, Software Developer* Jan 2014 - Present
Develops and manages hosting environment on custom VPS using Docker to serve a variety of projects from custom web applications to blogs.

Freelancer Aug 2008 - Dec 2013
Constructed web applications for clients. Most built in PHP + MySQL in varying degrees of complexity, as well as some simple static HTML + CSS websites along the way.

Ace Printing & Graphics *Graphic Designer* May 2011 - Dec 2013
Designed and created graphics for banners, billboards, logos, and websites while communicating with clients to create projects from concept to finished, printed works.

Built six custom workstations. Three that served as graphic editing stations, two print servers and one accounting station.

Florida Sea Grant *Web Developer* Jan 2012 - July 2012
Collaborated on a small team authoring a PHP based interactive survey using the Google Maps API to gather PhD thesis research data on the Sarasota Bay and the Ace Basin.L
